

2.4 Requirement

The requirement of the website is to build a website for 3 types of user : customer, seller and admin. I responsible for customer and seller part. I also do some part for guest user that not yet login too, because we want to attract user so we need to show our product to user even the user not register account.

2.5 Table of feature

Table 1: Table of feature

2.6. Working time table

In this internship I spend my first weeks learning about how to use vue.js with Laravel framework then I start analyzing the project's requirement and planning, coding and learning new technology at the same time, in the weekend I also require to do weekly report to company supervisor about my work progress and what I have learn in the week. I work really hard in
